

# LANDSCAPE SUPPLY

FOR IMMEDIATE RELEASE

## Landscape Supply to distribute PoaCure in multiple states

**ROANOKE, VA; MARCH 7, 2022** - Today, Landscape Supply launched a new partnership with Moghu USA based in New Jersey. Moghu was founded in 2012 to exclusively distribute PoaCure in the US markets. PoaCure has been tested by over 200 plus golf courses, researched by more than 30 plus universities and has over 20 papers published.

Kevin Connelly, Vice President states; 'This is a game changer for our company. We are thrilled to partner with Moghu and PoaCure. Not only are we partnering with a great product that cures poa, we are partnering with a great company. We are excited to hit the ground running with our LSI Education Academies.'

Landscape Supply will exclusively represent PoaCure in Maryland, Delaware, Virginia, West Virginia, the District of Columbia and many counties in Pennsylvania.

### **About Moghu USA:**

PoaCure was first tested in golf turf in 2009 by Dr. R. Harold Walker of Auburn University and Dr. Shawn D. Askew of Virginia Polytechnic and State University in the USA. Since then, almost every state university having a turfgrass program tested PoaCure. Several graduate students, including two Ph.D.s and four Masters degrees, received related to PoaCure research.

Moghu Research Center obtained the Experimental Use Permit (EUP) from U.S. EPA in 2014. Over 40 golf courses used PoaCure under EUP every year until 2018. In addition to the EUP, over 200 golf courses have tested through university trials. Consistent Poa control efficacy with high turfgrass tolerance were observed in all the tested trials.

Moghu Research Center applied for full registration to U.S. EPA first in 2015 and second in 2017. The "Unconditional Registration in Golf Course Turfgrass" was granted in December 2019. Moghu Research Center is proud of being able to launch PoaCure for the U.S. golf courses in 2020 and grateful for your patience and continuous support for a long time.
